Directions to the Indoor Tennis Courts:  Entering in from Spear Street take a right at the parking garage leading to the Patrick Gymnasium Entrance (Main Lobby North).  The courts are located on level two of the Patrick Gym Complex (same level as the basketball courts), on the Northwest end of the building.  EMS should be met outside the Patrick Gymnasium Main Lobby (north).  Guide them through the lobby, down the hallway to the Tennis Courts to the injured athlete.

AED Location:  Adjacent hallway, outside dance studio.

In the event of an injury:

1.  Athletic Trainer on site will decide if the injury requires EMS.  In the event an athletic trainer is unavailable; the highest-ranking staff member will assume responsibility for care of the athlete.  This person will be referred to from here as the ‘Responsible Party’.  Order of rank will be:  Head Coach, Assistant Coach, and Team Captain.  Always consider potential for spinal cord injury when moving an injured athlete.  Under no circumstances will the Responsible Party leave the injured athlete unless relieved by an ATC, MD or EMS.

2.  Activate EMS for all emergencies including, but not limited to:
   a.  Possible back or neck injury
   b.  Possible heat exhaustion or stroke
   c.  Compound or displaced fracture
   d.  Loss or altered consciousness
   e.  If an athlete stops breathing or has no pulse

3.  The Responsible Party, while attending to the athlete, will designate the next ranked individual to contact EMS.

4.  Upon contacting EMS, this person should identify themselves to the EMS personnel, give a clear description of the situation and provide directions to the location of the athlete.
   a.  The description of the situation should include:  the status of the athlete (level of consciousness), mechanism of injury, other symptoms, age of athlete and the telephone number and location from which you are calling.  DO NOT hang up until EMS hangs up first.

5.  This person will then proceed to unlock the appropriate doorways/gates and meet EMS at the entrance to the site and prepare to give a brief description of the situation to the EMS crew.

6.  Once EMS has stabilized and readied the athlete for transport, the person making the telephone call will accompany the injured person to the emergency room, if possible.  This person will be responsible for contacting the supervising AT or MD with information on the status of the injured athlete as soon as it is known.

7.  The parents of the athlete may be notified of the injury only with permission of the athlete.

8.  The Certified Athletic Trainer should fill out and properly file all appropriate injury forms and perform all appropriate follow-up procedures such as contacting the team M.D., Athletic Medicine Services Director, coaches, and Athletic Department with updated reports of the situation as indicated.

In the interest of the athlete’s right to confidentiality, under no circumstances are any individuals allowed to discuss the incident or circumstances surrounding it with anyone outside the UVM Athletic Medicine Staff without the student-athletes permission.  This includes the media, other athletes, coaches, administrators, and fans, etc.  If asked, politely respond, “I’m sorry, I’m not at liberty to discuss this” and refer them to the Athletic Medicine Services Director or Team Physician.
